ANNEXURE – I

PURPOSE & SCOPE OF SERVICES

Modules I

<u>Mobile Application, Profile Management, Data Management, Data Centre, Performance Recording and Analysis Module</u>

- Provide a dedicated mobile application (iOS & Android) for players, support staff, selectors, stakeholders, and administrators.
- Create profiles for individual players, support staff, stake holders and administrators
- Maintain a traceable daily activity calendar for all players in the system.
- Record, analyze, summarize, and organize the performance of players during and after camps/matches.
- Integrate match statistics for performance analysis.
- Compare performance statistics of more than one player with various filters in multiple windows within the same application.
- Establish a management platform with comprehensive data management system and analytics capabilities.
- Enable direct communication between support staff and players via the mobile application.
- Report health problems/injuries via the application or portal by the players.
- Periodically send performance reports to players.
- Alert notifications to players.
- Assist in planning and managing events.
- Provide an athlete monitoring system to record and manage player workload, physio and fitness reports and its follow ups.
- Continuous monitoring, tracking, and follow-up of all players within the system.
- Integrate with performance analytics tools/IDP associated with KCA.
- Coaches daily work monitoring including Geo tagging, activities etc.

- Helps in talent identification and talent development

Module II

<u>Video based Coaching Method</u>

- Allow players to share real time practice/camp/match videos to the coaches
- Allow players to upload match/practice videos to coaches via the mobile application.
- Allow coaches to view and analyze players camp/practice remotely.
- Coaches can share their feedback in real time (annotation can be made as video, audio, images, text etc)
